

Know before you vote for North Beaver Township Supervisor

Who will save our farm land from industrial solar?

INCUMBENT GRANT MCKINLEY		CANDIDATE HERM CVETAN CAMPAIGN PAID FOR BY TEXAS BASED R.E.D. PAC
<ul style="list-style-type: none"> Industrial solar only on industrial land (stripped, brown ground etc.) 	OR	<ul style="list-style-type: none"> 1200+ acres of industrial solar on prime farm land taking it out of production
<ul style="list-style-type: none"> Will keep current solar ordinance in place to keep solar panels off prime farmlands and on “industrial” land where “industrial” solar belongs. 	OR	<ul style="list-style-type: none"> If elected, Cvetan says will “try to overturn” current solar ordinance. Has leased farm land to solar and Cvetan will profit if ordinance is overturned.

FACTS

- R.E.D. PAC seeks out green energy candidates and uses out of town money to influence a local township election.
- Industrial solar company wants to put 300,000+ or more solar panels on prime farm land in North Beaver Township
- None of this solar energy will be used locally or in any way benefit North Beaver Township.
- Solar company is offering lots of money to hush those that oppose them.
- Solar company admitted solar fields will cause a “quality of life” change for the community.

CONCERNS FOR THE COMMUNITY

- Industrial solar on farm land is threatening the local farmers: Less land available at higher prices can cause farmers to scale back and / or possibly going out of business. After 40 years, leased solar land will either be kept in solar or developed. No one will be left to farm the land. Will it even be farmable?
- If industrial solar is installed on farm land, they could expand and take more farm land out of production. Will they stop once they get their foot in the door?
- A township study in Rhode Island shows that taxes may increase to compensate for lower land value as well as business losses due to less people wanting to live in the area next to industrial solar plants.
